

ECO **BUCKET™**

THE FUTURE IS PLASTIC-FREE

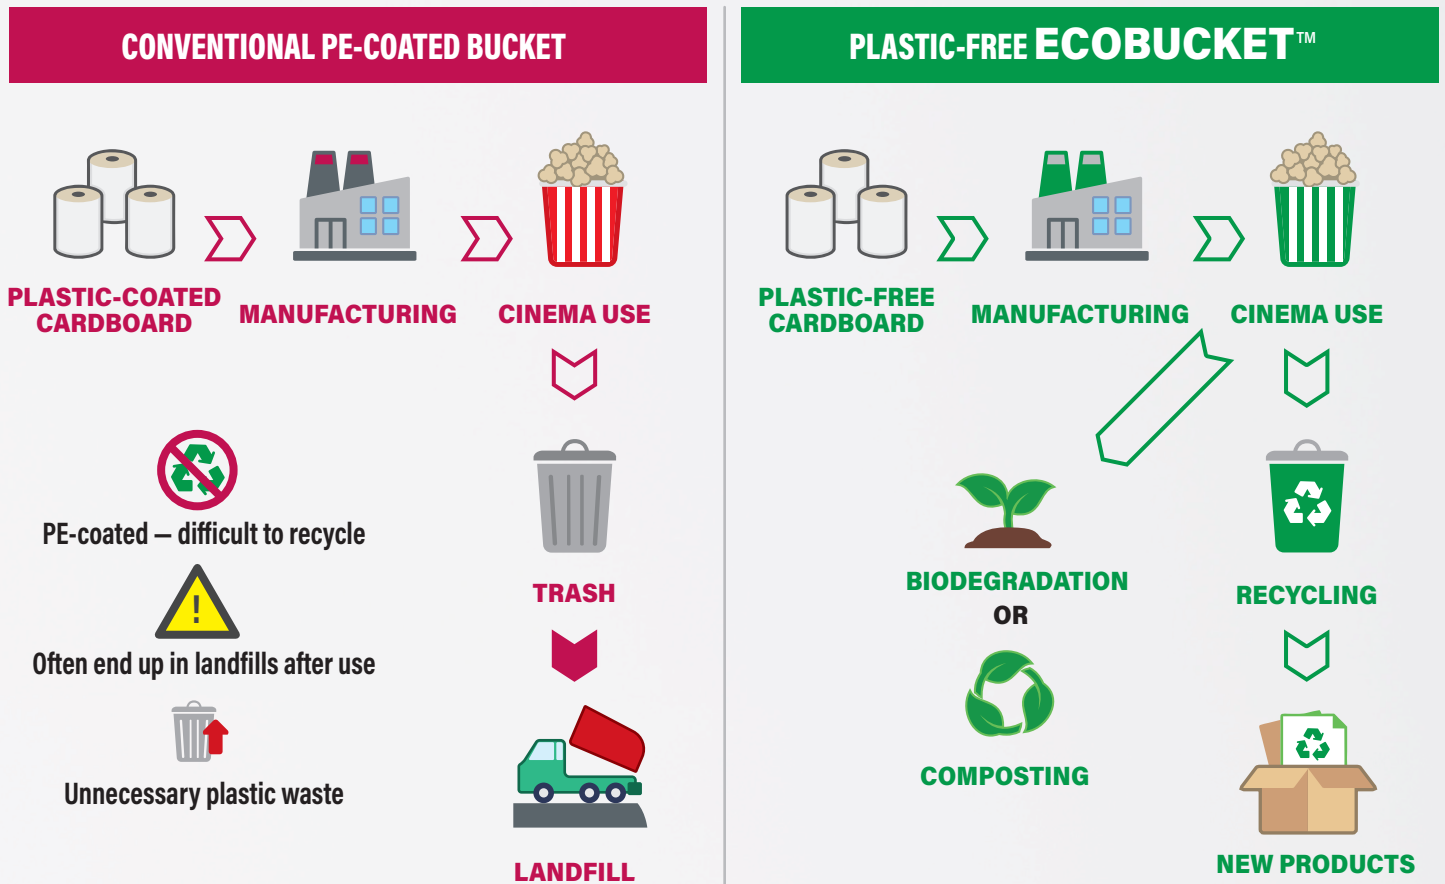

SAME PERFORMANCE. ZERO PLASTIC.

Cinema popcorn buckets generate thousands of tons of plastic waste.

What if they didn't need plastic at all?

Millions of plastic-lined popcorn buckets are used across cinemas worldwide. Most are used for less than two hours and then discarded. Because of plastic lining, most cannot be recycled.

ECOBUCKET™ was developed specifically to solve this challenge.

FULLY RECYCLABLE | SAME PERFORMANCE | PLASTIC-FREE | NO EXTRA COST

No operational changes required.

Integrates directly into existing cinema concession operations.

A sustainable solution designed for cinema environments.

Environmental impact estimates are based on the replacement of conventional PE-coated popcorn buckets with ECOBUCKET™ paper-based 170 Oz buckets for a volume of 1,000,000 units. Calculations use publicly available lifecycle and recycling data from CEPI (Confederation of European Paper Industries), the European Paper Recycling Council (EPRC), and the U.S. EPA WARM model, combined with industry averages for paperboard packaging and plastic production. Figures for recycled fiber, plastic avoided, trees equivalent, and CO₂ reduction represent indicative estimates intended to illustrate potential environmental benefits. Actual results may vary depending on regional recycling infrastructure, waste management practices, material sourcing, and consumer disposal behavior.

ECOBUCKET™

NOT ONLY IMPROVES THE SUSTAINABILITY PROFILE OF CONCESSION PACKAGING
IT DELIVERS A REAL ENVIRONMENTAL IMPACT THAT AUDIENCES WILL NOTICE.

EACH 1 MILLION UNITS COULD MEAN

AN APPROXIMATE
REDUCTION OF
47 TONS OF CO₂

**3 TONS SINGLE-USE
PE PLASTIC AVOIDED**

**56 TONS OF PAPER
COULD BE RECYCLED**

**SAVING A TOTAL OF
960 TREES**

* 39 TON BECAUSE OF PAPER RECYCLING + 8 TON BECAUSE OF PLASTIC AVOIDED

Calculate Your Cinema's Impact!

ECO
BUCKET™

Same cinema experience.
Same performance.
Zero plastic.

RECYCLABLE, COMPOSTABLE & BIODEGRADABLE*

- Industrial-scale production
- Compatible with existing filling systems
- Samples available upon request
